interim report 2015

Half-year report

Trade activity

As expected, the US market trended positively, and most European markets – with the notable exception of Austria – were growing slightly, including France. Even the lift modernisation segment showed signs of a slight recovery. On the opposite, whereas a stagnating market in China had been expected, it was in fact declining.

However, order intake of products grew by 14% (by approximately 5% excluding acquisitions and at constant exchange rates). Maintenance grew by 9%.

In total and at constant exchange rates, order intake was 7% higher. Unsatisfactory performance was recorded in Austria, Poland and China. Some of the strongest order intake was registered in the U.S., in the U.K. and in the Netherlands.

PACA was up 9%, ISEA 18% and KOS 14%. Switzerland posted a satisfying growth rate of 7% (in EUR) despite a decline in product order intake (-3%). Maintenance growth of 23% largely compensated the loss of competitiveness in the product business where some EU based competitors are aggressively using the weak Euro to gain market share.

Profit and loss

Sales, including work in progress, grew by 9.8% while the consolidated gross margin went up by 10.0%. The strong movements of the major exchange rates versus the Euro make the analysis of the different components of the P&L difficult as the major currencies strengthened significantly within only a few months (CHF +16%, GBP +12%, USD +23%). Taking into account the cost base in Switzerland, the impact of these variations on consolidated EBITA is an estimated loss of almost MEUR 1.0.

Nevertheless, EBITA increased by 9.4% and at a similar rate as turnover which kept the margin in percent of turnover constant compared to the first half of 2014 (9.3%).

The most significant forex impact is to be found in the financial result with a net exchange rate loss of MEUR 2.4 versus a small loss of MEUR 0.2 in 2014. The major part of this loss derives from the translation of the balances of Euro liquidity and receivables held at the Swiss headquarters which is a non-cash effect. If the Euro became stronger in the second half of 2015, the impact on the net profit would be positive.

However, net profit of the first half-year is down by 16.8%, also due to a higher tax rate.

Balance Sheet

The overall financial structure of the balance sheet remains strong with a net liquidity of MEUR 58.6 after payment of the MEUR 11.3 dividend in June. Net liquidity was MEUR 59.8 at the end of 2014. The gearing is at -28.6% versus -30.4% at the end of 2014.

Perspectives for the second half-year

Since 1 July, the Group closed three acquisitions (Paxter in Malaysia, Global Automatics in the U.K. and Imtech Toegangstechniek in the Netherlands) which are anticipated to add approximately MEUR 8.0 to 2015 Group sales, with limited integration costs.

The order book stays at elevated levels (approximately 20% higher than 2014), and we expect a continuous improvement of the market conditions. Sales expectations are revised to 10-12% growth versus prior year. The new range of flip flows developed for the U.S. market is particularly successful. EBITA could grow at the same magnitude as sales, especially if the Euro regains ground against the Swiss Franc.

Notes to the condensed consolidated interim financial statements

1 General information

agta record ltd (the "Company") is a company domiciled in Fehraltorf, Switzerland. The condensed consolidated interim financial statements as at and for the six months ended 30 June 2015 include agta record ltd and its subsidiaries (hereinafter referred to as "Group").

2 Statement of compliance

These condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard (IAS) 34 "Interim Financial Reporting". They do not include all of the information required for a complete set of IFRS financial statements and should be read in conjunction with the audited consolidated financial statements of the Group as at and for the year ended 31 December 2014.

These condensed consolidated interim financial statements have been reviewed, not audited.

The Company's Board of Directors approved these condensed consolidated interim financial statements on 10 September 2015.

3 Significant accounting principles

The accounting principles applied by the Group in these condensed consolidated interim financial statements are the same as those applied by the Group in its consolidated financial statements as at and for the year ended 31 December 2014. With effect from 1 January 2015, the Group applied the following new and revised standards and interpretations:

- Defined Benefit Plans: Employee Contributions (Amendments to IAS 19)
- Annual Improvements to IFRSs 2010-2012 Cycle various standards
- Annual Improvements to IFRSs 2011-2013 Cycle various standards

The above mentioned standards and new interpretations do not have a material impact on profit and equity of the Group.

4 Estimates

The preparation of condensed consolidated interim financial statements in conformity with IFRS requires estimates and assumptions by the Group Executive Management which affects the reported amount of assets and liabilities as well as contingent liabilities at the time of the closing and also expenses and income during the reporting period. The actual results may differ from these estimates.

The same estimation procedures and assumptions were used in these condensed consolidated interim financial statements as for the consolidated financial statements as at and for the year ended 31 December 2014.

5 Business Combinations

No acquisitions were made in the first six months of 2015.

On 21 August 2014, record Automated Doors (Australia) had acquired selected assets and had assumed selected liabilities related to the automatic door business of AGP Pty Ltd. The seller went into bankruptcy and later into liquidation in early 2015 and could not honour various contractual obligations related to the transaction. The performance of these obligations was partially secured by an escrow amount of TAUD 100 which subsequently became a receivable of record Automated Doors (Australia). The update of the purchase price allocation of this individually immaterial acquisition resulted in the reduction of goodwill to zero.

8 Fair Value

The Group did not have any financial instruments other than those measured at cost as of 30 June 2015. The carrying amounts of the financial instruments are a reasonable approximation of fair value.

9 Seasonality of revenues

Historically, revenues in the first half of the year have been lower than those in the second half. However, the magnitude of this general pattern is always obscured by the cyclical economic development in the various geographic markets. Therefore, and similar to previous years, no meaningful statement can be made with regard to the effects of seasonality in 2015.

On 24 July 2015, the Group acquired all the shares of Global Automatics Ltd. ("Global"), a Hemel Hempstead (UK) based manufacturer and distributor of automatic pedestrian door drive units, for GBP 0.75 million in cash and GBP 1.0 million in contingent consideration. Imtech Toegangstechniek is based near Rotterdam, the Netherlands, and offers a broad range of automatic pedestrian doors, security and access products and related maintenance and repair services in the Benelux countries. In 2014, Imtech Toegangstechniek achieved sales of EUR 16.0 million. It has approximately 100 employees and was acquired to strengthen the existing business of the agta record Group in the attractive Benelux market. The 266,750 phantom shares are subject to service and performance vesting conditions and expire on 31 December 2020. No expense was recorded during the reporting period.

No other events that could have an effect on the consolidated financial statements or that would require to be disclosed in this report have occurred between the balance sheet date and 10 September 2015, the date of approval of the condensed consolidated interim financial statements by the Board of Directors.
